

# LOCAL NATIVE PLANT SUPPLIERS

This list should get you started – keep in mind that while all of these sources sell Southern Appalachian native plants, they also sell plants native to the southeast, or North Carolina, but NOT the southern Appalachians. They may also carry many hybrids, cultivars, and Asian/European species. **So, if you want native southern Appalachian plants ONLY, pick and choose carefully!**

*-Jay Kranyik, Chair, BGA Horticulture Committee*
